

What these ads are: each ad is a finished image (headline, description & button already on it) in two sizes — **1200x628** (rectangle) and **1200x1200** (square) — that links to a matching landing page. Run them as **Responsive Display Ads** in a Google **Display** campaign.

⚠ **Before you start:** These are political / issue ads. Google requires **advertiser identity verification** (can take a few days), and the Women's Rights ad may need extra certification and can be limited by region. Also set up **billing** and, ideally, **conversion tracking** (a Google tag on civix250.ai firing on sign-up).

STEP-BY-STEP

1. **New campaign:** Google Ads → Campaigns → New campaign.
2. **Objective:** choose **Leads**.
3. **Campaign type:** select **Display** → Continue.
4. **Settings:** name it; set **Locations** to only the states where sign-up is allowed (TX, CA, IL, MD, CO, NV, OH, GA, MI, NY — confirm current list); set a **daily budget**; bidding = **Maximize clicks** to start.
5. **Ad group:** create one **ad group per ad** (cleaner reporting).
6. **Build the ad** (Responsive display ad): paste the **Final URL**; upload the **1200x628 + 1200x1200** images; add the **Civix250 logo** and business name; fill short **headlines/descriptions**; CTA = **Sign up**.
7. **Repeat** steps 5–6 for each ad with its own images + URL.
8. **Review** → **Publish**. Ads go "Under review" (~1 day; longer for political).

GOOD TO KNOW

- The message is **already on the image**, so keep the text fields short and non-redundant (headlines ≤30 chars, descriptions ≤90).
- Want the image shown **exactly as-is** with no Google-added layout? Use **"Upload display ads"** instead — but that needs standard banner sizes (300x250, 728x90, 160x600, 300x600, 970x250), which can be generated on request.
- **Performance Max** is an easier alternative (auto-runs everywhere with the same two image sizes) but gives less control.
- The **same images + URLs** also work on **Meta (Facebook/Instagram) Ads** — square is ideal; vertical 4:5 / 9:16 versions recommended for mobile.
